THE PINE STUMP:
NATURE’S CONTAINER FOR WOOD ROSIN...

pinovasolutions.com/sell-your-pine-stumps
Pine trees are among our nation’s most resilient and renewable natural resources, blanketing the Southeastern coastal plain from North Carolina to Louisiana.

Above ground, mature pine trees are cut and trucked away for lumber and building products. Yet below ground, the pine stump remains. For over a century, Pinova has utilized these same stumps as the foundation of a global industry.

Through a mutually-beneficial process, Pinova partners with land owners and land managers to harvest the pine stumps of two specific and indigenous species, longleaf and slash pine trees, which possess the richest rosin content.

Pinova works closely with land owners and land managers to harvest longleaf and slash pine stumps and return the land back to its best use through sound forestry practices. The partnership with Pinova is grounded in a shared love and stewardship for the land and a shared respect for pine forests.
STUMP HARVESTING DEFRAYS SITE PREP COSTS, IMPROVES THE PRODUCTIVITY OF THE LAND, ENCOURAGES NATURAL REFORESTATION AND REMOVES FUEL FROM THE FOREST FLOOR DURING PRESCRIBED BURNS

The experienced team of Pinova foresters, working in seven southeastern states, engages directly with land owners and land managers. The foresters will walk the land, identify the suitable stumps, and negotiate a contract for the stumps with the owner or manager.

Truckloads of harvested stumps are shipped to the Pinova production plant in Brunswick, Georgia beginning a process by which their naturally-formed rosin and oil are extracted, refined and reborn into an array of specialty products.

The natural rosins extracted from pine stumps provide the basis for a broad range of high performance specialty resins for the world's most essential industries and best known brands.

Pinova fully utilizes the entire stump, incinerating the remaining wood fibers to generate 100% of the steam and 30% of electricity for the Brunswick plant. Responsibly repurposing the entire stump reflects Pinova’s corporate commitment to sustainability and environmentally-centered stewardship.

If you are an owner or manager of a pine forest located in the southeastern states, please call (912) 265-3550 or visit pinovasolutions.com/sell-your-pine-stumps.
